PROFESSIONAL SUMMARY

B.Tech Computer Science and System Engineering student graduating in 2027 with hands-on project experience in SaaS platforms, AI-enabled applications, backend APIs, and responsive web interfaces. Skilled in Python, Java, C++, JavaScript, SQL, React.js, FastAPI, NumPy, Git, and cloud fundamentals. Strong interest in software engineering, AI/ML applications, backend development, and scalable product engineering.

EDUCATION

Kalinga Institute of Industrial Technology (KIIT) | Bhubaneswar, India

Bachelor of Technology in Computer Science and System Engineering | Year of Passing: 2027 | CGPA: 7.8/10

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, JavaScript, SQL

Frontend: React.js, responsive dashboard development, component-based UI

Backend & APIs: FastAPI, REST APIs, SaaS architecture, microservices fundamentals

AI/ML & Data: Generative AI, AI/ML fundamentals, NumPy, anomaly detection concepts, vector search concepts

Developer Tools: GitHub, VS Code, Git workflow

Cloud & Platforms: AWS cloud fundamentals, Microsoft cloud certification coursework

PROJECTS

Multi-Tenant Generative AI SaaS Platform | *React.js, FastAPI, Python, JavaScript, AI APIs, Vector Search*

- Built a unified SaaS platform concept that aggregates AI utilities such as text-to-image generation, neural translation, and intelligent vector-based search into one responsive dashboard.
- Designed the platform around multi-tenant SaaS and microservices principles to support modular feature delivery, scalable backend services, and high-throughput AI workflows.
- Created an ATS-relevant product architecture involving frontend dashboards, backend API orchestration, AI service integration, and searchable knowledge retrieval.

AI Health Monitoring SaaS Platform | *Python, FastAPI, AI/ML, LLM Chatbot, Real-Time Monitoring*

- Developed a health monitoring platform concept for tracking patient vitals and detecting abnormal patterns using AI-driven anomaly detection workflows.
- Integrated emergency-alert logic for low-latency medical alarms when monitored vitals indicate risk or sudden health deterioration.
- Designed an LLM-powered medical chatbot to provide contextual symptom guidance, triage support, and instant health insights for users.

CERTIFICATIONS

- Artificial Intelligence Certification - Coursera
- AI/ML Certification - Coursera
- Meta Back-End Developer Professional Certificate - Coursera
- AWS Cloud Certificate - Microsoft
- Economic and Health Systems and Applications - Coursera

ADDITIONAL STRENGTHS

- Comfortable building end-to-end academic projects involving frontend, backend, database, and AI service components.
- Able to explain technical designs clearly and translate product ideas into implementation-ready modules.
- Actively preparing for software development, backend engineering, AI/ML engineering, and cloud-oriented internship roles.
